HOUSE STREET/HEBRON AVENUE ROUNDABOUT

The House Street / Hebron Avenue Roundabout will be constructed in the Spring of 2018. This roundabout will be a safety solution for the high volume of vehicular accidents occurring at this intersection. To keep the community apprised of updates regarding this project, we have created this dedicated web page. All updates, road closures, and other announcements related to this project will be posted below in reverse chronological order. You can also subscribe to receive updates to your email through the town's [notification system](#). Just select the "roundabout construction" category under the News heading.

NEW - March 29, 2018 - Construction Work to Begin on, or Around, April 9th

Construction on Hebron Avenue between Main St. and Sycamore St. will begin on or around April 9, 2018. Work within the corridor will include a new roundabout at the intersection of House Street and Hebron Avenue as well as pavement rehabilitation of the entire roadway outside of the new and existing roundabouts. Work outside of the roundabout project limits will generally consist of removing and replacing the entire pavement structure. Granite curb will be installed throughout and some sidewalk sections will be reconstructed in order to accommodate new grades. The new configuration will satisfactorily resolve a quantifiable safety issue at the House Street intersection and provide needed improvements to the Hebron Avenue driving surface.
