

# Wireless Internet Access Glastonbury Center Green

---

The Glastonbury Center Green is located at the intersection of Main Street and Hebron Avenue in Glastonbury. The Wireless Coverage emanates from the Gideon Welles House across the street. There is good coverage throughout the Green area. The area tinted in blue shows the approximate coverage area. In order to attach to the network a computer will need to be set for DHCP, which most computers are by default. When connecting to the network, select the "ToG Wireless BG" or "ToG Wireless A" SSID (Service Set Identifier).
