# WOOD REUSE

Glastonbury Goes Green Bulletin No. 17 Parks and Recreation Issue **July 17, 2009** 

# The Town of Glastonbury

OB

## INTRODUCTION

**C**3

The Parks and Recreation Department is responsible for the care and maintenance of all public grounds, including the trees in parks, on school properties and in other public spaces. Responsibilities also include caring for trees located within the public right-of-way along all local roads. With 206 road miles and more than 180 town-owned parcels, it is a big job.

Tree care typically involves the removal of dead and hazardous trees, pruning ornamental trees, and trimming trees that pose conflicts with sidewalks, sight lines at intersections and overhead clearances along roadways. The volume of brush and limbs that require disposal is considerable. Not only can the brush consume a lot of space in the bulky waste disposal area, but it can also be labor intensive and costly to transport.

# WOOD CHIPPER YIELDS EFFICIENCY

CORDED WOOD PRODUCES SALES

Looking to gain efficiencies in its maintenance operation, the Parks and Recreation Department purchased a new 15-inch brush chipper in 2009. The chipper has improved operations by allowing staff to chip the brush at the work site, which

eliminates the need to transport piled brush to the bulky waste site. In addition, the wood chips can be used for erosion control and to resurface trails throughout the park system. The new chipper not only increases productivity; it also reduces fuel consumption and the emission of greenhouse gases, and it creates a reusable wood product.

Wood suitable for sale as cord wood is salvaged, seasoned and split before being sold to residents in 1/8 cord lots.

Please consider the environment before printing a copy of this bulletin. The information will remain available on our web site.

## GLASTONBURY'S GREEN INITIATIVES PROGRAM

Glastonbury's Green Initiatives program operates under the direction of the Town Manager. The committee is chaired by the Purchasing Agent and the Superintendent of Sanitation. Committee members from across Town departments participate and contribute ideas and suggestions committed to a "greener" community.

The committee assembles information about products and services and makes the information available to specific departments that can evaluate them and develop applications in Town projects with the approval of the Town Manager.

These "Go-Green" bulletins contain information about the results of product evaluations and other accomplishments of Town departments. We hope this information can provide you insight to the Town's green initiatives and also lead others in the community to find ways to use environmentally preferable products. Please contact us if we can help you with further information or if you have additional suggestions.
