

**SUBSURFACE SEWAGE DISPOSAL SYSTEM
ABANDONMENT SIGN-OFF SHEET**

The Town of Glastonbury Code of Ordinances, Section 19-167 requires that, after a connection is made to the Town sanitary sewer system, any septic tanks, cesspools, and similar private sewage disposal facilities shall thereafter be promptly abandoned and filled with suitable material.

Also, under the Connecticut Public Health Code Regulation and Technical Standards for Subsurface Sewage Disposal Systems, Section II Location of Subsurface Sewage Disposal Systems, Section D entitled "System Abandonment", it states:

"Abandonment of subsurface sewage disposal system components (i.e. septic tank, hollow leaching structures) or cesspools shall be performed in such a manner as to eliminate the danger of the system components or structure inadvertently collapsing. The responsibility for abandonment lies with the property owner. Structures that are to be abandoned shall be emptied of all sewage/wastewater prior to abandonment. Structures shall be filled with sand, gravel, or crushed, and the area backfilled with clean soil."

Therefore, let it be known that I (we), _____,
