

TOWN OF GLASTONBURY

**BID GL-2010-26**  
**Two (2) Platform Dump Bodies & Hoists**  
**Installed on F350 Cab & Chassis**

**Addendum #1 – Dated 12/03/09**

**DUE DATE 12/9/09 @ 11:00 A.M.**

Add to Detailed Specifications 3.0, Item 1.

“Please note that the Ford F350 trucks are 56” CA and were purchased as “pick up box delete” vehicles. As such, the fitting of a Rugby LR 416 hoist will require an adaptive custom made sub frame or partial sub frame to accommodate the use of this hoist on the truck frame. The cost of this sub frame should be inclusive in the overall bid with the sale of the truck body, hoist and labor to install them. Additionally, the vendor is to assure that all components work together to dump the bed without damage to any of the components and without voiding warranties or causing any other operational, maintenance or warranty concerns. The sub frame shall not raise the height of platform dump by more than 6” (when in the down position). The vendor may be asked to supply a description of the adaptation before the award of the bid.

**Please confirm receipt of this addendum by 12/07/09 by 10:00 A.M. to Kathy Hughey @ (860) 652-7590 (Fax)**
