	ASDRC Design Guidelines Checklist				
	Putnam/Glastonbury Boulevard				
	Design Guideline	Standard	Complies:	Comments	
			(Y/N) or N/A L. Site Design		
1 1	Ganaral Sita Dasign	•	One Design		
1.1	General Site Design	T		T	
1	To the maximum extent possible, all significant existing natural and cultural resources and scenic views shall be preserved, protected, or restored. This includes but is not limited to, stone walls, steep slopes, large boulders or ledge outcroppings, specimen trees or stands of trees, waterbodies, scenic vistas, ridgelines or other significant geological or unique site features.	Preferred			
2	Utilities shall be situated below ground and existing overhead services relocated below ground wherever feasible.	Preferred			
3	Gas station canopies shall be designed as an integral part of the station architecture.	Conditional			
4	Gas station fueling areas including pumps and canopies shall be located at the side of the lot and the associated store or station building should be located at the front of the lot. The design of freestanding structures (such as kiosks,	Conditional			
5	garages, storage units, recycling or trash enclosures, etc.) should be coordinated with the primary building through the repetition of form, materials, details and color.	Preferred			
6	The infill development of large parking lots of shopping centers that are set back from the street is encouraged.	Preferred			
1.2	Vehicular Circulation				
1	Curb cuts shall be located away from the corners of an intersection to provide safe entry and exit from the site.	Preferred			
2	Driveways that exceed 30 feet in width and are intersected by sidewalks shall incorporate pedestrian refuge islands a minimum of 5 feet wide.	Preferred			
3	Driveways shall be located to minimize conflicts with pedestrian circulation.	Preferred			
4	Driveways leading to or from drive thrus shall be designed to avoid conflicts with pedestrians. When there is potential conflict with pedestrian circulation, techniques shall be used to improve pedestrian safety and increase driver awareness such as signage, lighting, raised crosswalks, changes in paving, or other devices.	Preferred			
5	The layout and design of vehicular and pedestrian circulation, including interior drives, parking areas, and walkways shall provide for safe interior circulation and separation of pedestrian, vehicular and service traffic.	Preferred			

	The number of curb cuts provided should be the		
	·		
6	minimum necessary to provide adequate site access.	Preferred	
	A single curb cut and driveway is preferred although		
-	secondary access may be provided from side roads.		
	The use of shared driveways by adjoining properties		
7	is encouraged as a means of reducing the number of	Preferred	
	curb cuts.		
	Curb cuts should only be as wide as necessary to		
8	accommodate needed lanes. Curb radii should be	Preferred	
	kept to a minimum.		
	Service and delivery drives, if present, should be		
9	separated from internal walkways, parking areas, or	Preferred	
	pedestrian use areas by landscaped areas or islands.		
1.3	Parking Areas		
	Landscaped islands that are equal in area to at		
1	least 10% of the parking lot pavement area shall be	Preferred	
	provided in parking lots with 40 or more spaces.		
	Landscaped islands and/or pedestrian access shall be		
2	provided within parking areas so as to allow no more	Preferred	
<u>_</u>	than 20 parking spaces in a row.		
	Landscaped parking lot islands shall be a minimum		
3	of 9' in width and should be planted with shade trees	Preferred	
	and hardy plant materials suitable for parking lot		
<u> </u>	conditions.		
	Parking areas of commercial, mixed-use, or multifamily		
	buildings adjoining single-family residential		
4	properties or districts shall be sufficiently screened	Preferred	
	from those abutting properties with evergreen		
	trees and shrubs, earthen berms, walls, or fences a		
-	minimum of four feet in height.		
	One shade tree per 5 parking spaces should be		
	provided within or along the perimeter of parking		
	areas. Up to 25% of this requirement may be met		
5	through the use of ornamental trees providing those	Preferred	
	trees do not interfere with sightlines or vehicular		
	movement when mature. The required number of		
	trees may be reduced if existing shade trees directly		
\vdash	adjacent to the parking area are preserved.		
6	Off-street parking should be located to the side or	Preferred	
\vdash	rear of a principal building.		
7	Parking should be consolidated into an area that	Preferred	
\vdash	serves multiple buildings or establishments. Connections between parking lots and driveways on		
	abutting properties should be provided and parking		
8	lots should be designed to allow for possible future	Preferred	
	connections with abutting properties.		
\vdash	Concrete or stone curbing is preferred at parking lot		
9	edges where curbing is required. Bituminous curbing	Preferred	
٦	is discouraged.	riciciicu	
\vdash	The location of off-street parking within the front		
Р	yard setback is prohibited.	Prohibited	
1 /	Bicycle Parking	1	1
	Outside bicycle racks should be provided with a		
	capacity of one bike per 5,000 square feet of building		
	gross floor area or 10% of the number of automobile		
1	parking spaces (whichever is greater) and should	Preferred	
	be located no more than 100 feet from the building		
	entrance in which the rack is intended to serve.		
Ц	The second secon	<u>I</u>	

	Diamata manta manuta la caka di mikhim kha ma da skui su	ı	
	Bicycle racks may be located within the pedestrian		
2	area of the public right-of-way provided the location	Preferred	
	does not interfere with pedestrian mobility or other		
	functions in that space.		
	Inverted U style bicycle racks, circular racks, or		
3	variants thereof are preferred over "wave" or "comb"	Preferred	
	style racks.		
1.5	Pedestrian Circulation		
	Sidewalks shall be provided along the full perimeter		
1	of the property along public streets.	Preferred	
	Direct pedestrian access shall be provided between		
	public sidewalks and storefront and building		
2	entrances and between parking lots and storefront	Preferred	
	and building entrances.		
	Walkways shall be a minimum of five feet wide to		
	allow two people to pass comfortably. Additional		
3	width may be necessary in certain areas with	Preferred	
3		Pielelieu	
	heavy pedestrian traffic or where parked cars could		
_	overhang the walkway.	 	
4	Concrete, brick pavers, and other high-quality	Preferred	
<u> </u>	materials shall be used for walkways.	ļ	
	The sidewalk materials of public sidewalks that		
5	intersect driveways near the street should continue	Conditional	
ľ	across driveways rather than be interrupted by	0011411101141	
	driveway paving.		
	The grade of public sidewalks should be maintained		
6	across driveways through the use of driveway ramps	Conditional	
ľ	and aprons in favor of using pedestrian ramps to	Conditionat	
	lower sidewalks to driveway grade.		
7	Internal walkways should be connected with	Preferred	
Ľ	walkways on abutting properties as feasible.	Fielelieu	
	Areas adjacent to walkways should be landscaped		
8	with trees, shrubs, flower beds, ground covers, or	Preferred	
	comparable materials as space permits.		
Р	The use of asphalt for walkways is prohibited.	Prohibited	
	Outdoor Spaces		
-	The front yard between a public sidewalk and		
1	building shall be landscaped or occupied by highquality	Preferred	
1	outdoor gathering spaces.	i iciciicu	
	A consistent design palette of materials shall be used	<u> </u>	
2	across outdoor gathering spaces.	Preferred	
\vdash	Outdoor seating areas shall be protected and	<u> </u>	
	separated from parking areas by curbs, low fences,		
3	stone and masonry walls, or plantings a minimum of	Preferred	
	· · · · · ·		
<u> </u>	three feet in height.		
4	Decorative trash receptacles shall be provided where	Preferred	
	waste disposal is likely to occur.	ļ	
1	Functional open spaces such as patios, courtyards,		
5	or plazas should be provided in association with new	Preferred	
	development.		
6	Outdoor spaces should be positioned to make best	Preferred	
Ľ	use of sun or shade.		
7	The scale of outdoor areas should be commensurate	Preferred	
Ľ	with the scale of adjacent buildings.	Fielelieu	
	Outdoor gathering spaces should be designed so that		
_	adjacent buildings have windows, terraces or other	Droformed	
8	features that provide a visual connection between the	Preferred	
1	building tenants and the open space.		
	•	-	

	Where plazas and outdoor gathering spaces are		
		Destance	
9	provided, walkways should be directed through	Preferred	
	those spaces to activate the spaces.		
10	Public seating, planters, and low walls should be	Preferred	
	used to define outdoor public gathering spaces.	TTOTOTTOG	
	Focal elements such as sculpture, fountains, and civic		
11	art should be included in outdoor gathering areas	Preferred	
	where appropriate.		
	Vacant public spaces that lack amenities such as	5.	
D	seating, public art, or landscaping should be avoided.	Discouraged	
1.7	Landscaping	<u> </u>	
_	Existing mature trees shall be preserved as feasible		
	and incorporated in the site design. If removed, trees		
1	should be replaced with specimens of comparable	Preferred	
_	species.	- ·	
2	Foundation plants shall be provided.	Preferred	
3	Ground covers such as grass and plantings shall be	Preferred	
Ĺ	used for large unprogrammed areas.		
4	Hardy plant species that are native to the region shall	Preferred	
Ľ	be included in landscaping.	i iciciicu	
5	Landscaping shall be used to screen unsightly areas.	Preferred	
	Landscaping within the front yard should		
1	include shade trees and should be designed and		
6	programmed to maintain the visual and pedestrian	Preferred	
	connection between the street and building entrance		
	or storefront.		
	Plantings, fences, walls, earthen berms, and other		
7	screening elements should be similar in form, scale	Preferred	
′	and appearance to other similar elements on the site.	i iciciieu	
\vdash	Low impact development strategies such as rain		
8	gardens should be used to reduce stormwater runoff.	Preferred	
	The use of irrigation systems should be minimized in		
9	favor of the use of hardy native plant materials.	Preferrerd	
\vdash	Trees should be selected and planted to maximize	-	
	·		
	shade in summer months and access to sunlight		
10	in the winter particularly with respect to outdoor	Preferred	
	gathering spaces and along south facing building		
	facades.		
D	Extensive area of mulch shall not be used as a	Discouraged	
	substitute for vegetative ground covers.	2.000010600	
	The planting of invasive species (as identified by		
Р	the Connecticut Invasive Plant Working Group) is	Prohibited	
L	prohibited.		
1.8	Fences & Walls		
	Fences and walls shall be designed and located to		
1	avoid barriers to pedestrian circulation.	Preferred	
	Fences and walls shall not exceed 4 feet in height in		
2	any front yard.	Preferred	
	Fences and walls should be used to visually reinforce		
3	a space, add a decorative element, or provide	Preferred	
١		rielelleu	
\vdash	screening. Low fences and walls should be used to provide	-	
	•		
	street edge definition where a building is		
4	significantly set back from the roadway or to define	Conditional	
	large areas in front of a retail building used for		
	dining or other programming.		
5	White fences that are at least 50% open are preferred	Conditional	
Ľ	for fences.	Conditional	
6	Stone walls are preferred for walls.	Conditional	

	The core of about the bearing as to be control from a con-					
Р	The use of chain link fence, metal mesh fence, or	Prohibited				
	highway guardrails is prohibited.					
	Service Areas		T			
	All service areas including waste collection and					
	storage facilities, loading and unloading areas,					
	loading docks, storage facilities, dumpsters,					
1	recycling areas, fueling areas and vehicle service and	Preferred				
	maintenance areas shall be located at the side or rear					
	of the principal building and out of direct site from					
	public sidewalks.					
	Where a service area may be visible from a street or					
	public sidewalk, the service area shall be screened					
	with a wall that is comparable in or complementary					
2	to materials and design of the adjacent building	Preferred				
	facade. Service areas visible from main entrances,	Fielelieu				
	abutting neighborhoods, public open spaces, and					
	walkways shall be screened through the installation					
	of a wall, fence, or plantings.					
	2. B	uilding Orient	ation and Mas	ssing Guidelines		
2.1	Building Orientation & Massing					
	Large buildings shall be designed with smaller					
1	distinct masses consistent with the scale of	Conditional				
	traditional buildings in the Town Center.					
2	The height of large buildings shall be varied through					
	breaks in the roof line or through varying the	Preferred				
	number of stories.					
	Most of a building should be placed at the front of					
3	the lot to maximize front façade exposure to the	Conditional				
3	public. The front façade should be kept parallel to	Conditional				
	the street.					
	Buildings on corner lots should be located and					
4	designed with as much mass near the intersection as	Preferred				
7	possible to help anchor the lot and take advantage of	Treferred				
	the high visibility.					
5	A complex of smaller buildings is preferable to a	Preferred				
Ľ	single large structure.					
	For sites with multiple buildings proposed, efforts					
6	should be made to vary the footprint among the	Preferred				
	building forms to minimize the overall sense of mass					
	of the collective buildings.					
	The height of a portion of a new building directly					
7	adjacent to a lower structure should be designed to	Preferred				
	relate to the lower structure.					
8	The first floor should have a minimum height of 12	Preferred				
	feet and should be taller than upper floors.					
	Upper stories may be set back to provide visual					
9	interest and to distinguish between street-level	Preferred				
	commercial uses and upper story residential uses.					
40	Residential balconies should be contained within the	D f				
10	building envelope and should not protrude beyond the building façade of lower stories.	Preferred				
	uie buituing laçade of tower stoffes.	3 D	ng Docign Cui	dolinas		
2.1	3. Building Design Guidelines					
3.1	Building Features	I	1			
	Building ornamentation shall be appropriate to the	D				
1	architectural style and shall appear integrated to the	Preferred				
<u> </u>	design of the building.					

	Aution lations in the release of the forced that comment			
	Articulations in the plane of the façade that express		1	
	the structural units of the building such as pilasters,		1	
	moldings, columns, a change in material, or an offset	Droferred	1	
2	in the wall plane or other detailing shall be used to	Preferred	1	
1	create an interesting design, reinforce rhythms, and		1	
	cast shadows.			
\vdash	Horizontal articulation techniques such as moldings,	 		
1			1	
3	a change in material, or an offset in the wall plane	Preferred	1	
	shall be used to distinguish lower stories from upper			
	stories.			
	The size, scale, motif, and use of materials for the			
1	front façade design shall be kept consistent across		1	
4	the façade in order to tie the entire composition	Preferred		
1	together. The use of a variety of design styles across		1	
1	the façade is discouraged.		1	
\vdash	Openings in masonry buildings shall express a	 		
_		Drofe		
5	structural lintel or arch to express how it is carrying	Preferred		
<u> </u>	the weight above.			
1	The size and proportion of structural elements		1	
	such as posts or columns shall be appropriate to the			
_	weight they appear to be carrying. Columns which	Drofore		
6	support larger masses, such as upper floors, shall	Preferred		
1	have more mass than columns supporting lighter		1	
1	elements such as a porch roof.		1	
\vdash	Where shutters are installed, they shall be	 		
7	proportional to the size of the window or door and	Preferred	1	
'	l	Ficienteu	1	
\vdash	should appear to be operable.	 		
8	A strong cornice or string course should be provided	Preferred		
Ľ	between the first floor and upper floors.			
	Design elements should be used consistently across a			
9	building form and façade to avoid the appearance of	Preferred	1	
L	an overly complex building form.	<u> </u>		
	Higher levels of fenestration should be directed			
	towards the first-floor level near pedestrian areas.	[_ i		
10	The upper stories of a building may have decreased	Preferred		
	levels of fenestration.		1	
\vdash	Vertically proportioned elements (which are	 	 	
1	generally taller than they are wide) should be used to		1	
11		Preferred		
	help give buildings a taller, lighter and more stately			
	appearance.			
1	The proportions of design elements such as		1	
12	windows, columns, or bay spacing should be kept as	Preferred	1	
L	consistent as possible across the façade.	<u> </u>		
	The use of recessed elements such as window and			
13	door insets is encouraged to create visual interest	Preferred		
	and add dimension to a façade.			
\vdash	Traditional architectural constructs should be used	 	 	
1 /	in building façades to differentiate the 'base', 'middle'	Preferred		
14		rieieiieu		
-	and 'top' of the building.	 	ļ	
1	Commercial building functions such as warehouse		1	
	and storage spaces should be oriented to the rear			
15	of buildings that also contain more public oriented	Droforrad		
15	commercial uses. The design and construction of	Preferred	1	
1	that part of the building may be more utilitarian in		1	
	design.			
	The use of exterior shading devices is permitted			
10	- '	Droforrad	1	
10	to manage solar gain, particularly on south facing	Preferred	1	
Ш	façades.	<u> </u>		
	<u> </u>	<u>. </u>	<u> </u>	

	Nationwide commercial chain or franchise designs		
	that have not been adapted in accordance with these	Discouraged	
D	·	Discouraged	
	Design Guidelines are discouraged.		
Р	Flat façade designs and large areas of blank wall are prohibited.	Prohibited	
<u>_</u>			
3.2	Roofs	1	
	Subtle breaks and fluctuations in the roof line shall		
1	be incorporated to highlight important areas of the	Preferred	
	building (such as the entry) and break up longer		
	runs of façade/roof area.		
	Sloped roofs shall have a minimum pitch of 6 over		
2	12. Roof pitches ranging from 8 over 12 to 12 over 12	Preferred	
	pitch are desired.		
3	The color of the roofing material shall complement	Preferred	
Ľ	the color and materials of the building's façade.	Ticicirca	
4	The use of basic gable and hip shaped roofs is	Preferred	
Ļ	encouraged.	Ticiciicu	
5	Sloped roofs are preferred particularly on portions of	Preferred	
Ľ	a building two stories tall or higher.	Ticiciicu	
6	Sloped roofs should overhang walls by at least 6	Preferred	
Ľ	inches.	i iciciieu	
	Projecting elements such as overhanging eaves,		
7	awnings, projecting gables, and dormers should be	Preferred	
	used to reinforce a traditional sense of scale.		
	Dormers or gables should be used along the front		
8	of buildings with pitched roofs to help maintain a	Preferred	
l°	prominent façade and to divert rainwater, snow, and	Fielelieu	
	ice away from entrances.		
	Dormers should be predominately fenestrated and		
9	should incorporate minimal wall surfaces other than	Preferred	
	architectural trim or ornament.		
	Flat roof structures, if used, should be capped by an		
10	articulated parapet design that acts as a structural	Preferred	
	expression of the building façade and its materials.		
D	The use of false roof fronts and similar applied	Discouraged	
٦٥	designs is discouraged.	Discouraged	
Р	The use of high gloss roofing materials is prohibited.	Prohibited	
	The use of stripes and high-contrast geometric	5	
Р	patterns on a roof is prohibited.	Prohibited	
3.3	Façade Materials		
	Masonry veneers shall be full depth at corners so as		
1	to not appear as a surface veneer.	Preferred	
	A complementary mixture of materials is preferred	_	
2	over a single material on building façades.	Preferred	
	When using more than one material on a façade,		
	it is recommended to use one material to establish		
3	the dominant theme while using other materials to	Preferred	
	compliment or accentuate the design.		
	When making a transition from one material to the		
	next, it is recommended that the change occur at a		
4	hard edge or "bump-out" in the façade. This helps	Preferred	
	to create a surface for the first material to terminate		
	into before the second one begins.		
	The use of traditional materials such as painted wood	†	
	siding (shingle, clapboard, board and batten), brick,		
5	stone, or alternative materials that appear similar	Preferred	
Ĭ	and have proven durability is preferred, especially on		
	the front façade and near pedestrian areas.		
6	If stone is used, locally quarried stone is preferred.	Preferred	
<u> </u>	stand to dood, toodity quarried storie to prototred.		l l

	If used, brick should be provided in traditional unit		
7	' '	Preferred	
-	Sizes.		
	The use of Exterior Insulation and Finish Systems		
D	(EIFS), panelized brick veneer, cultured stone veneer,	Discouraged	
	or plastic composite surfaces is discouraged.		
P	Large, panelized products or other materials that	Prohibited	
Ľ	result in extensive featureless surfaces are prohibited.	Trombited	
Р	The use of vinyl siding is prohibited.	Prohibited	
	With the exception of doors and windows, the use of	5	
Р	highly reflective materials is prohibited.	Prohibited	
	Large, exposed areas of concrete foundation visible		
Р	from the street or public areas is prohibited.	Prohibited	
3.4	Entrance Location & Design		
-	The primary building entrance shall be placed at the		
1	front of the building and be clearly identifiable from	Conditional	
1 -	the street.	Conditionat	
-	Retail entrances shall be oriented to the street and		
_		Conditional	
2	primary retail entrances should not be exclusively	Conditional	
	located at the side or rear of a building.		
	Exterior entrances to each storefront or retail		
3	tenant shall be clearly delineated to convey a sense	Preferred	
1	of individuality through the use of architectural		
	detailing, signage, landscaping, and lighting.		
	Private entries for residential uses in a mixed-use		
4	building shall be located and designed so as to	Preferred	
	distinguish those entries from retail entrances.		
	Garage doors or vehicular entrances to a building,		
5	if present, shall be located at the side or rear of a	Preferred	
	building where feasible.		
	Where it is not feasible to place a building entry		
	directly on the front façade or oriented towards the		
6	street, attempts should be made to ensure that it is	Conditional	
	readily visible from the main road or internal street.		
	A corner entrance may be used to provide access		
7	from the street and from a side yard parking area.	Conditional	
	Exterior entrances should be provided for all firstfloor retail		
8	businesses.	Preferred	
-	The use of canopies or awnings, covered porches		
	or arcades, and similar recessed front entry areas		
9	is encouraged to shelter pedestrians from adverse	Preferred	
	weather and draw attention to the point of entry.		
	Structures required to provide ADA compliant		
	access to a building should be made as discrete as		
	possible by incorporating design elements of the		
10	building that it serves and/or locating the ramp to	Drofe	
10		Preferred	
	the side or rear of a building provided that the ramp		
	location provides convenient access for those with		
<u> </u>	mobility limitations.		
3.5	Storefronts		
1	Storefronts shall be orientated to the street and accessible	Preferred	
Ľ	directly from public sidewalks.	ricienteu	
	All ground floor retail facades that face public areas,		
2	including streets, shall have display windows and entrances	Preferred	
1	facing a public area or street.		
_	A majority of the ground floor elevation of a storefront	Duef	
3	should be occupied by glazing.	Preferred	
	Entrance doors should have clear glazing and should be		
4	oriented towards a public sidewalk.	Preferred	

_	The constitution of the co	1		
	The use of false windows (windows that are not actively			
D	used to display products or provide a view into the store) is	Discouraged		
	discouraged.			
3.6	Windows			
1	Windows should be arraged in a regular rhythm.	Preferred		
	Window openings should have a square or vertical (not			
2	horizontal) proportion.	Preferred		
	The scale of large windows, particularly those oriented			
	horizontally should be divided into vertical elements	Preferred		
٥	through the use of mullions or montins.	Fielelieu		
	If used, modern window types such as window walls,			
	picture windows, awning, and casement windows should be			
	·	Destaurant		
4	designed and placed to establish a consistent rhythm and	Preferred		
	proportional spacing that borrows from traditional			
	architectural styles.			
Р	Mirrored or substantially tinted door and window glass is	Prohibited		
	prohibited.			
	Awnings		_	
	All awnings on a single building shall be of similar			
1	style, use the same type of materials, and have the	Preferred		
	same valance style.			
2	Lettering and advertising shall be limited to the	Droforrad		
Ľ	valance of the awning.	Preferred		
	Awnings, if used, should be an integral part of the			
	façade design, should be located directly over doors	5 ()		
3	or windows, and should fit the shape of the window	Preferred		
	or opening that it is affixed to.			
	The color and style of awnings should complement			
4	the façade of the building.	Preferred		
	Awnings with simple striped patterns or subtle			
5	patterns may be permitted.	Preferred		
	Canvas material is preferred for awnings. Awnings			
8	should not be made of reflective material such as	Preferred		
	metal or plastic.	Treferred		
	Awnings should be a minimum of 7 feet above			
7	sidewalks or spaces accessible to people.	Preferred		
	The use of half dome and boxed awnings is			
Р		Prohibited		
_	prohibited.			
	Use of Color	1		
	When multiple colors are used on the exterior of the			
1	building, only one color should be used as the main	Preferred		
1	theme, with the other colors used more sparingly to			
L	create accents.			
I	The main color theme should be a natural or muted			
2	shade. Brighter, more vibrant colors should be	Preferred		
	reserved for minor accents and highlights only and	Ticiciicu		
<u> </u>	should be used sparingly.			
3	Contrast should be used between primary and	Preferred		
٥	accent colors.	riciciieu		
4	Trim color should complement the building's	Dreferred		
_4	primary color or material.	Preferred		
	The use of color schemes associated with a brand or			
D	franchise for primary elements of a building facade	Discouraged		
	is discouraged.			
_	The use of high intensity, highly reflective, chrome,	Donald III in the		
Р	metallic, or fluorescent colors is prohibited.	Prohibited		
3.9	Mechanical Equipment		•	
<u>ت</u>	Mechanical, electrical, and utility equipment shall be	T		
1	discretely located and screened from public view.	Preferred		

_	Where reaften machanical units would be visible	1		
	Where rooftop mechanical units would be visible			
2	from public view, low-profile or recessed mechanical	Preferred		
	units shall be used.			
3	Plumbing and mechanical roof vents shall be located	Preferred		
٥	out of public view wherever practical.	Preferreu		
	If installed, solar panels shall be placed on a non-street			
4	facing roof or placed so as to minimize their productive	Preferred		
	operation.			
	Chimneys should be appropriately located and			
	massed in proportion to the massing of the building			
5	itself, and particularly to the massing of the roof and	Preferred		
١	should be located and designed to be consistent with	Fielelieu		
	the architectural style of the building.			
-	·	-		
	With exception of rooftop equipment that is			
P	screened from view, mechanical equipment shall not	Prohibited		
	be located on the primary street-facing façade.			
3.1	0 Additions	-	•	
	Wall plane or roof ridge offsets shall be used between			
1	additions and the original building to distinguish the	Preferred		
L	addition from the original building.			
	Where an addition is proposed to an existing			
	building that is not compliant with these Design			
	Guidelines, the original building shall be upgraded	1		
1	to better meet these standards and the addition	1		
2	should be designed to complement the upgraded	Preferred		
	building while also complying with these Design			
	Guidelines as feasible to present a design that is			
	compatible and complementary.			
	Where an addition is proposed to an existing			
	building that meets the standards of these Design			
	Guidelines, the addition shall be designed to	Dueferned		
3	<u> </u>	Preferred		
	complement or match the materials, form, color, and			
	detailing of the original building.	<u> </u>		
	Windows in new additions shall be spaced to reflect			
	or complement the proportions and rhythm of the			
4	windows on the existing building, though they	Preferred		
	may be diminished in scale to reflect the secondary			
	importance of the addition to the original structure.	ļ		
5	Additions should be placed to the side or rear of the	Preferred		
L	original building.			
		4. Lighting an	nd Sign Desigr	Guidelines
4.1	Lighting			
	All light fixtures, whether facade, sign, or site			
1.	lighting shall be dark-sky compliant and selected and	Des Commit		
1	oriented to reduce light pollution and prevent glare	Preferred		
	and spillover onto adjacent properties.			
	The alignment and spacing of light fixtures on a			
1	building façade shall follow a regular pattern that is	1		
2	coordinated with the design of the building and site	Preferred		
	lighting.			
	Light fixtures serving pedestrian areas shall be	†		
	provided at a human scale and may include a			
3	combination of ground level fixtures, bollard	Preferred		
	fixtures, and light poles less than 16 feet in height.	1		
\vdash		+		
	Ornamental street lights, of a style selected by the			
4	Town, shall be located consistently in the curbside/	Conditional		
1	pedestrian area of the right-of-way along the	1		
	perimeter of a property.	1		

	I Calcife with could be considered in the Colored Colored Colored	1	
5	Lighting should complement the intended use of a	Preferred	
	building by highlighting signage and entrances.		
	Mixed lighting sources such as display window		
	lighting, sign lighting, entranceway lighting, and		
6	vehicular area lighting should be designed and used	Preferred	
	as components of a single system.		
-	The minimum level of luminescence needed to		
_		D farmani	
/	achieve visibility, comfort, and safety for vehicular	Preferred	
	and pedestrian traffic should be used.		
8	Lower intensity distributed light sources should be	Preferred	
0	used instead of single higher intensity fixtures.	Ficiencu	
	Walkway lighting should directly illuminate the		
9	walkway with enough peripheral distribution to also	Preferred	
	illuminate the immediate surroundings.		
	Parking area light fixtures should be decorative and		
10	the poles supporting those fixtures should be located	Droforrad	
10		Preferred	
	within raised planting areas or behind curbs.		
11	The color temperature of light fixtures should be	Preferred	
Ľ	3,000K or less.		
	The placement of parking lot light poles on raised		
D	concrete bases within parking lot pavement is	Discouraged	
	discouraged.		
_		Discouraged	
	The use of box or cobra head lighting is discouraged.	Discouraged	
Р	Flashing or color changing lights are prohibited.	Prohibited	
4.2	Sign Location & Scale		
	Multiple sign types and locations with a common	5 (
1	theme are preferable to a single larger sign.	Preferred	
	Signs should be located in consideration of the	1	
2	rhythm and scale of other signs in the area to avoid	Preferred	
		Fielelieu	
-	conflict and visual clutter.		
	Signs should be scaled to the immediate audience.		
3	Different signs for vehicular and pedestrian traffic	Preferred	
	are encouraged.		
D	Bright sign background colors, including large white	Discouraged	
10	areas, should be avoided.	Discouraged	
	Signs shall not project above the façade of any		
Р	building.	Prohibited	
4 2	Wall Signs	1	
+.3	If used, wall signs shall be designed as an integral	T	
1	element of the architecture. The shape and materials	Preferred	
1	of the sign should complement the architectural	1.5.5.764	
	features on the building.		
	For buildings with multiple storefronts, wall signs,		
2	if used, shall be centered on structural elements that	Preferred	
	define an individual business.		
	If used, wall signs should be located within the frieze	1	
2	of the cornice, on a covered transom, or on another	Preferred	
ا ا		Fielelieu	
<u> </u>	flat and unadorned surface.		
l _P	Wall signs shall not obscure any trim or other facade	Prohibited	
Ŀ	details.		
4.4	Ground Signs		
	Landscaping shall be used to complement ground	5	
1	signs and blend them into the surrounding area.	Preferred	
H	Ground sign structural supports and exposed	1	
	foundations should be constructed of or veneered		
_		Desta	
2	with stone, brick, heavy gauge metal, or wood and	Preferred	
	should be designed as an integral or complementary		
L	component of the sign panel.		
_		-	

_	Cround signs should be evianted normandicularly to	ı ı	
	Ground signs should be oriented perpendicularly to		
	the street, within the cone of vision of drivers on the		
3	adjacent roadway. Signs may be oriented parallel to	Preferred	
	the street if the sign is sufficiently setback from the		
	roadway.		
D	The use of top-heavy, pole-mounted, ground signs	Discouraged	
Ē	should be avoided.		
4.5	Overhang Signs		
1	Overhanging signs shall be scaled and oriented to	Preferred	
_	pedestrians.	Ticiciicu	
	Overhanging signs shall have a minimum of 7 feet		
2	clearance between the sign and areas accessible to	Preferred	
	pedestrians below.		
3	An overhanging sign shall project no more than four	Preferred	
3	feet from the building to which it is attached.	Ficiented	
	An overhanging sign shall not project above the		
Р	cornice line of the building or above the sills of	Prohibited	
	second story windows if present.		
4.6	Window Signs		
	Window signs, as permitted within the total		
	sign allowance established by the Building Zone	Duefermed	
1	Regulations, shall not cover more than 25% of the	Preferred	
	total window area of retail windows.		
	Window signs should be scaled for and oriented	Duefermed	
2	towards pedestrians.	Preferred	
_	Directly lit window signs such as neon signs or signs	Duale ileita al	
Р	with integrated LED lighting are prohibited.	Prohibited	
4.7	' Sign Lighting		
	Gooseneck, sconce, pendant, and letter halo lighting	Duefermed	
1	styles may be used for illuminating signs.	Preferred	
	Light fixtures for externally lit signs should		
2	complement the color and design of the sign and the	Preferred	
	architecture of the building.		
	The illumination level on the surface of externally		
	lit signs should be bright enough to render the sign		
3	legible and provide a noticeable contrast with the	Preferred	
	surrounding building or landscape without causing		
	excessive glare or reflection.		
	Internally lit translucent plastic signs and flashing	Destruction of	
Р	signs are prohibited.	Prohibited
